- 📍 Ladkrabang, Bangkok, Thailand

## SKILLS

### Abilities

- Web developer (Full stack).
- Image processing.
- Cloud.
- Mobile developer (Studying).

### Programming Languages

- Python JavaScript(ES6)
- HTML SQL
- CSS PHP

### Libraries & Frameworks

- React Robot Framework
- YOLO Flask
- JQuery Bootstarp

### Tools & Platforms

- Github Gitlab
- AWS GCP
- Docker Jenkins
- GoCD Terraform

### Design

- Figma Photoshop
- Canva

## EDUCATION

King mongkut's institute of technology  
Ladkrabang (2021 - Now)

GPA : 3.24

(Bachelor of Computer Engineering)

Pattani Technical College (2019 - 2021)

GPA : 3.70

(Department of Computer Technology)

## PROJECT EXPERIENCE

### Front-end Builder

Present

- Front-end Builder is a low-code tool designed for building front-end web pages swiftly, enabling users to create and customize web interfaces efficiently. It enhances convenience in API testing, providing a clearer visualization of API results.

### Sketch-2-Code

25 Oct 2023

- This project incorporates a system that leverages image processing technology to read images and generate HTML files with processed images. The system utilizes the Yolov5 and Yolov7 models for object detection on images and is proficient in converting images in various formats such as JPEG and PNG into HTML code.

### Gintuay.com (Front-end,Back-end)

23 Nov 2022

- This application is a web-based platform dedicated to a Food Delivery System, developed using HTML, CSS, and ASP.NET technologies. The system is designed to facilitate seamless and efficient food ordering and delivery processes.

## INTERNSHIP

### Infrastructure @ Krungsri Auto

30 Sep 2023

- During my internship, I focused on app development and worked extensively with the GoCD pipeline. My main responsibilities included managing builds, conducting tests, and overseeing implementation. This experience enhanced my skills in both backend and web app pipelines. I also gained experience in infrastructure and DevOps by collaborating with the development, testing, and DevOps teams. This collaboration deepened my understanding of the app development lifecycle. I am ready to apply this knowledge and skills to future projects, further enhancing my expertise in this field.

## ACHIEVEMENTS

- HPE Aruba academy College Network Enterprise Competition Advantage 2021
- 2 Runner up AFT 2021 Networking Management
- Innovation and Invention Based on Research Methodology Contests 2020
